

MailUp for Salesforce

Overview

Using **MailUp for Salesforce**, the connector that links your Salesforce and MailUp account, you can ensure a high level of deliverability for your Salesforce Campaigns, leverage MailUp's message editing tools, and easily import campaign statistics back into Salesforce.

Install the [MailUp for Salesforce connector](#), and you will be able to easily send professionally designed email campaigns to your contacts and retrieve campaign statistics back into your Salesforce organization.

Features summary

The MailUp for Salesforce connector includes the following features:

- Create a new campaign in Salesforce and "push" the members to a new Group in MailUp with one click
- Create a message linked to the Salesforce campaign, and edit it in MailUp using professional email message editing and testing tools (e.g. dynamic content, spam check, preview in multiple email clients, etc.)
- Check campaign results directly from Salesforce, in a pop-up window that displays data coming from MailUp: Opens, Unique Opens, Clicks and Bounces
- Import more detailed campaign statistics into Salesforce and display them both at campaign and campaign member level

How to Install, Manage campaign recipients and Create Messages
