

# SOAP API

19 Sep 2018 The SOAP API is no longer recommended to use if you are starting a new project or planning to extend an existing one. Please consider using the MailUp [REST API](#) instead

The MailUp SOAP API consists of a series of Web Services that can be used to perform a large array of tasks. The API is available free of charge. Read about [Best practices](#) to understand what you can do and learn the recommended approaches.

The following classes of Web services are currently available (and new ones are added all the time):

- **MailupImport** - Can be used to...
  - manage the subscribe/unsubscribe
  - import subscribers
  - send subscription confirmation messages
  - etc.
- **MailupSend** - Can be used to...
  - Create an email or text message
  - Retrieve a list of existing email or text messages
  - Send or schedule an email or text message
  - Check an email message delivery status
  - etc.
- **MailupManage** - Can be used to...
  - Retrieve lists and groups
  - Create new groups
  - Remove groups
  - etc.
- **MailupReport** - Can be used to...
  - access message statistics
